RESPONSIVE WEB PAGE WITH A REGISTRATION FORM

Aim:

To create a responsive web page with a registration form using HTML5, CSS3, and Bootstrap grid system.

Description:

This program is a simple responsive registration form created using HTML, CSS, Bootstrap, and a little JavaScript. The form collects basic user details like name, phone number, email, and password. Bootstrap classes are used to make the form look clean and responsive so it adjusts properly on different screen sizes such as mobile or desktop. A small JavaScript function is also added to automatically insert the country phone code when the user selects a country. Overall, this program demonstrates how Bootstrap can be used to create attractive and user-friendly web forms quickly.

Algorithm:

1) Start the program.
2) Create the basic HTML structure using <html>, <head>, and <body>.
3) Link the Bootstrap CSS library to style the form.
4) Set the background color of the webpage using CSS.
5) Create a container to place the registration form at the center.

6) Add a heading titled Registration Form.
7) Create a form element to collect user information.
8) Add a text input field to enter the user's full name.
9) Add a dropdown menu to select the user's country.
10) Create a phone number input field for contact details.
11) Use JavaScript to automatically add the country code to the phone field.
12) Add an email input field for the user's email address.
13) Create password and confirm password input fields.
14) Add a checkbox for agreeing to the terms and conditions.
15) Add a Register button to submit the form and end the program.

Code:

```
<!DOCTYPE html>
<html lang="en">
    <head>
        <meta charset="UTF-8">
        <meta nmae = "viewport" content="width = device-width,initial-scale =
1.0">
        <title>Responsive Registration Form</title>
        <!--Bootstrap 5 CDN-->
        <link
href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/css/bootstrap.min.css"
    rel="stylesheet">
    <!--Custom CSS-->
    <style>
        body {
      background: linear-gradient(135deg, #ea6a6a, #f5a7e5);

    }
    .form-container {
```

```
      background-color: white;
      border-radius: 15px;
      box-shadow: 0 4px 10px rgba(0, 0, 0, 0.2);
      padding: 30px;
      width: 100%;
      max-width: 500px;
    }
    h2 {
      text-align: center;
      margin-bottom: 20px;
      color: #333;
    }
    </style>
    </head>
    <body>
  <div class="container">
    <div class="row justify-content-center">
      <div class="col-md-8 col-lg-6">
        <div class="form-container">
          <h2>Registration Form</h2>
          <form>
            <!-- Full Name -->
            <div class="mb-3">
              <label for="fullname" class="form-label">Full Name</label>
              <input type="text" class="form-control" id="fullname"
placeholder="Enter your full name" required>
            </div>

            <!-- Email -->
            <div class="mb-3">
